SUMMARY

Results-driven Full-Stack Software Engineer with a life sciences background, experienced in designing and delivering production-grade web platforms. Proficient in building performant, accessible, and maintainable frontend applications using React and Next.js, alongside robust backend and systems-oriented solutions with TypeScript, Express.js, and NestJS.

Strong analytical and problem-solving skills, with a research-driven approach to translating complex technical and domain requirements into practical, scalable, and secure software solutions. Collaborative and adaptable, with a commitment to engineering best practices, continuous learning, and long-term professional growth.

WORK EXPERIENCE

SOFTWARE DEVELOPER

D3NTIQ — DENTAL PRACTICE MANAGEMENT PLATFORM

- Architected a HIPAA-aligned, multi-tenant platform using Clean Architecture and SOLID principles to decouple core dental business logic from external frameworks, implementing 3D interactive charting (Three.js) and a hybrid GraphQL/REST API for complex clinical workflows.
- Engineered a scalable, domain-driven backend with NestJS and Prisma/PostgreSQL, featuring strict use-case layering across 10 domains, RBAC-secured JWT authentication, and comprehensive Vitest/Jest coverage for mission-critical reliability.
- Developed a modular Next.js 15 frontend delivering a 4-role RBAC dashboard and a comprehensive provider dashboard with 3D odontograms (Three.js), real-time messaging, and high-fidelity imaging tools.
- Tech Stack:** Next.js, React, TypeScript, Mantine UI, Tailwind CSS, TanStack Query, Three.js, NestJS, GraphQL, Prisma, PostgreSQL, JWT, Docker, Vitest, Jest.

DATA ANALYST

MEDICAL DATA INSIGHTS & VISUALIZATION PIPELINE

- Designed a Python-based data pipeline to clean, normalize, and analyze clinical datasets, implementing reproducible transformations and generating visual insights such as correlation heatmaps and categorical analyses.
- Applied analytical thinking to extract actionable health patterns from raw datasets.
- Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn

WORK EXPERIENCE

2025

BACKEND DEVELOPER

CLINICQUEUE — HEALTHCARE OPERATIONS PLATFORM

- Designed and built a modular, domain-driven backend using TypeScript and Express.js, implementing high-concurrency patient intake and automated triage scoring with MongoDB schemas optimized for high-read healthcare workloads.
- Engineered a reliable real-time infrastructure by integrating Socket.io for live queue updates and Redis-backed background processing (BullMQ) to handle non-blocking asynchronous tasks, ensuring 99.9% system uptime during peak traffic.
- Tech Stack:** TypeScript, Express.js, MongoDB, Redis, Socket.io, Jest.

2025

FULL-STACK DEVELOPER

ACCESSGATE — EVENT MANAGEMENT & TICKETING SYSTEM

- Led end-to-end development of a high-integrity ticketing ecosystem using Next.js and TypeScript, featuring secure JWT-based RBAC, QR code generation, and an idempotent validation engine to prevent duplicate entries and ensure data consistency.
- Optimized platform scalability and deployment by architecting RESTful APIs with Mongoose-driven data models, implementing real-time attendance analytics, and containerizing the entire environment with Docker for seamless production orchestration.
- Tech Stack:** Next.js, TailwindCSS, Material UI, TypeScript, Express.js, MongoDB, JWT, Docker.

2024

FRONTEND DEVELOPER

PREDICTGALORE — SPORTS PREDICTION PLATFORM

- Developed an admin-driven sports prediction platform enabling scheduling, management, and publishing of betting predictions, with a focus on clean architecture, predictable data flow, and long-term maintainability.
- Improved application robustness and performance by applying TypeScript-first development, implementing scalable UI patterns with optimized state management to reduce unnecessary re-renders, and enforcing backend validation and authorization controls.
- Tech Stack:** Next.js, TypeScript, Redux Toolkit, Material UI.

WORK EXPERIENCE

2024

FULL-STACK DEVELOPER

RENT-A-RIDE — VEHICLE BOOKING PLATFORM

- Built a vehicle booking and reservation platform supporting search, availability checks, and user reservations, with backend APIs designed to handle safe and consistent state transitions across the booking lifecycle.
- Improved performance and extensibility by implementing server-side rendering and caching strategies for faster search and page loads, and structuring the system to isolate transactional logic in preparation for future payment integration.
- **Tech Stack:** Next.js, Express.js, MongoDB, Tailwind CSS, Chakra UI.

2024

FULL-STACK DEVELOPER

LUMINAWELL — HEALTH & WELLNESS TRACKING PLATFORM

- Developed a health and wellness tracking platform enabling users to monitor activity, hydration, mood, and weight, with a scalable frontend architecture and backend APIs designed to support time-series health data.
- Optimized performance, maintainability, and user experience by leveraging server-side rendering, structured global state management with isolated domain logic, interactive data visualizations, and responsive, accessible UI patterns.
- **Tech Stack:** Next.js, Redux Toolkit, Express.js, MongoDB, Chart.js, Chakra UI.

2024

FULL-STACK DEVELOPER

TOYCAC'24 — CAMP & CONFERENCE PLATFORM

- Developed a full-stack web platform for a large-scale camp and conference event, supporting attendee registration, information dissemination, and real-time communication.
- Implemented a scalable and maintainable architecture using server-side rendering for performance, efficient global state management, RESTful APIs, and real-time chat integration to support high user concurrency.
- **Tech Stack:** Next.js, Tailwind CSS, Redux, Express.js, MongoDB, LiveChat.

WORK EXPERIENCE

INDUSTRIAL TRAINEE

OYO STATE MINISTRY OF AGRICULTURE — DEPARTMENT OF FISHERIES

- Conducted data collection and analysis on aquatic ecosystems, water quality, and fisheries resources to support evidence-based, sustainable resource management.
- Collaborated with multidisciplinary teams to implement fisheries management strategies, ensuring compliance with environmental regulations and promoting long-term ecological balance.

2023

EDUCATION

- National Youth Service CorpsJogadek Farm, Ogun State
2024-2025
- B. Sc in Zoology
Second Class Honours - Upper DivisionUniversity of Ibadan
2018-2024
- Secondary School CertificateTunmise Comprehensive Model College
2011-2016
- Primary School CertificateDistinction Model School
2006-2011

TECHNICAL SKILLS

- Languages:JavaScript, Python, HTML5, CSS3
- Libraries:React.js, Node.js, Express.js, Redux Toolkit, React Query
- Frameworks:Next.js, Nest.js,
- Database:MongoDB + Mongoose, PostgreSQL + Prisma
- Version Control & CI/CD:Git & Github, Github Actions, Docker Compose
- Hosting & Deployment:Digital Ocean, Vercel, Render, AWS EC2,
